To do!

Modify the README file, push the changes and make sure you can see them in gitlab!

In the README put: Name, date, and the answer to the following question: What is something you're good at that people wouldn't expect?

Go into your local repo, change the file.

Then:

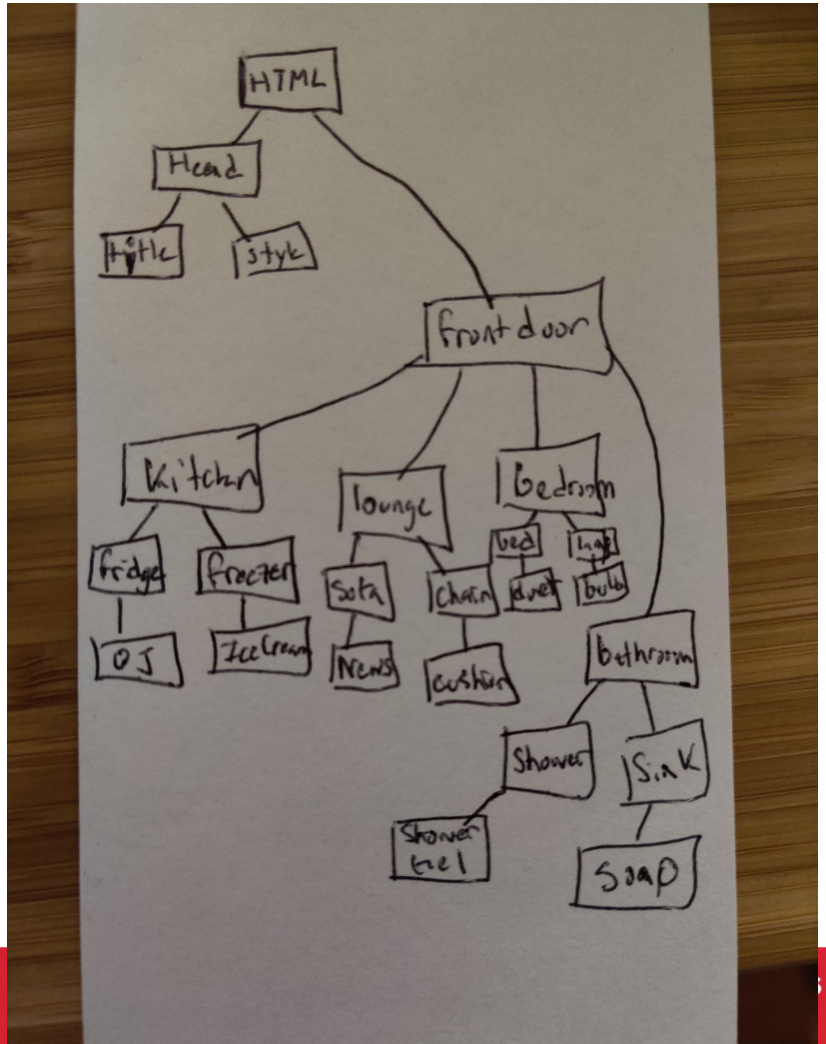
git add --all

git commit -m “Changed README”

git push origin master

Warm Up

Draw out DOMExample.html's DOM tree!



HTML
Head
title
style
front door
Kitchen
lounge
Bedroom
fridge
freeter
sofa
chair
bed
light
duvet
bulb
OJ
IceCream
News
cushion
bathroom
Shower
Sink
Shower gel
Soap

Warm Up

Write an example html page where:

.names p {...}

will style a paragraph, but

.names > p{...} **will not**.

```
!DOCTYPE html>
<html>
    <body>
        <div class = “names”>
            <article>
                <p>They key is to not have paragraph as the
                    immediate child</p>
                </article>
        </div>
    </body>
</html>
```

Warm Up!

Write the JavaScript to do the following:

- Create a variable using var
- Create a different variable using let
- Display variable1 * variable2 in a pop up

```
var num = 5;

let num2 = 3;

alert(num*num2);
```

Practice

Write a function to take a word, w, and a number, n, then return a string with the word, n number of times.

```
function printNtimes (w, n){
    let word = “”;
    for(let i=0; i<n.length; i++){
        word+=w
    }
}
```
